SL-Lab-Mid-Term-Assessment

Overview Repositories Projects Packages Teams People Settings

### Seamless communication with teams

Teams are a great way for groups of people to communicate and work on code together. Take a look at why they're great.

- Flexible repository access**  
You can add repositories to your teams with more flexible levels of access (Admin, Write, Read).
- Request to join teams**  
Members can quickly request to join any team. An owner or team maintainer can approve the request.
- Team mentions**  
Use team @mentions (ex. @github/design for the entire team) in any comment, issue, or pull request.
